28th and 29th January 2026

AI-Driven Finance for Non-Finance Leaders

Talha Ameer Khan

Adjunct Faculty, Financial Modelling and Security Analysis

Talha Ameer Khan, CFA is a seasoned investment professional with 12+ years of experience in investment banking, corporate finance, and green energy. As Managing Director, Investments at Burj Clean Energy Modaraba Pakistan's first Shariah-compliant green listed fund; he spearheads renewable energy investments and has led the fund's IPO and capital mobilization from key institutional investors.

Learning Outcomes

- Analyse financial statements and key ratios to assess business health using AI-driven tools.
- Evaluate performance and variances through budget analysis, cost logic, and scenario simulations.
- Make smarter pricing and project decisions using NPV, IRR, hurdle rates, and AI-enabled stress testing.
- Anticipate cash and working capital risks using predictive dashboards and liquidity insights.

3rd and 4th February 2026

The Agentic Supply Chain

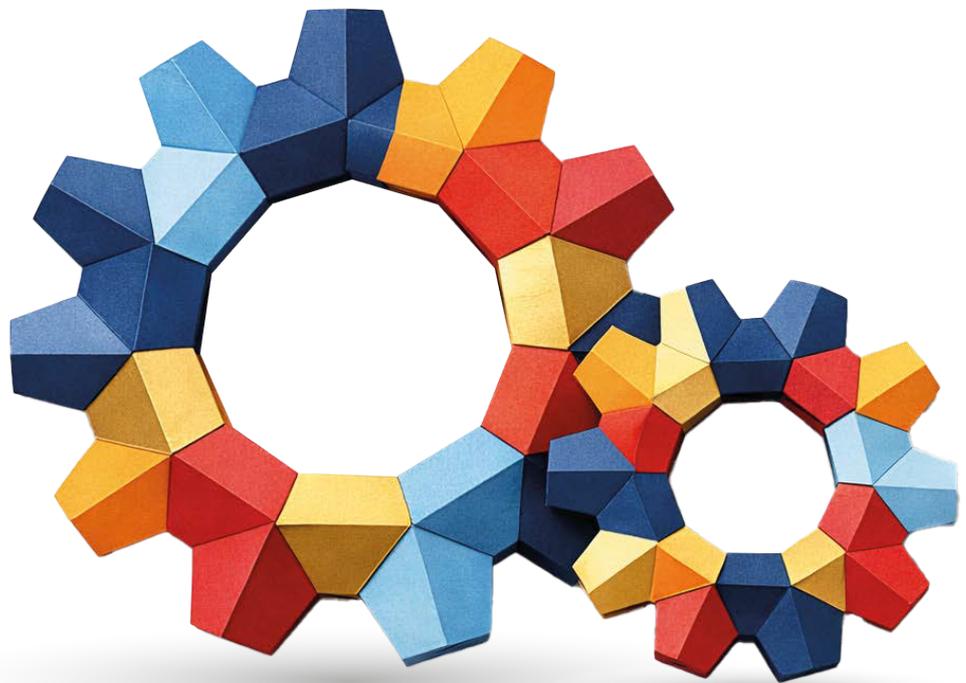

Dr. Naveed Iftikhar

AI strategist, educator, and co-founder of atomcamp

Dr. Muhammad Naveed Iftikhar is an AI strategist, educator, and co-founder of atomcamp, specializing in AI-driven strategies and training for business and government institutions. He has led AI capacity-building programs across the Middle East and South Asia for organizations such as ARAMCO, UBL, Bank Alfalah, UNDP, and public-sector bodies.

Learning Outcomes

- Understand how supply chains are evolving from dashboards and analytics to AI-and agent-driven, decision-centric operating models: and what this shift means for leadership, structure, and competitive advantage.
- Gain hands-on exposure to agentic systems by designing a simple supply chain agent that monitors conditions, reasons over data, and prepares actions, building intuition for real-world application.
- Learn how to identify, prioritize, and structure AI and agent-based use cases, align data foundations, and design a pipeline that moves from ideas to pilots and scaled deployment.
- Develop a clear AI strategy and commissioning approach for supply chain teams, including where to start, how to launch pilots, organize teams, and balance speed, value, risk, and governance.

9th and 10th February 2026

Financial Modeling: Fundamentals & Valuation

Talha Ameer Khan

Adjunct Faculty, Financial Modelling and Security Analysis

Talha Ameer Khan, CFA is a seasoned investment professional with 12+ years of experience in investment banking, corporate finance, and green energy. As Managing Director, Investments at Burj Clean Energy Modaraba Pakistan's first Shariah-compliant green listed fund; he spearheads renewable energy investments and has led the fund's IPO and capital mobilization from key institutional investors.

Learning Outcomes

- Build integrated three-statement financial models driven by business assumptions and forecasts.
- Evaluate value and viability using DCF, supporting schedules, and key financial drivers.
- Use AI-assisted tools to speed up analysis and improve clarity of outputs.
- Translate numbers into decisions through clear stakeholder communication and working-capital simulations.

31st March and 1st April 2026

Design Thinking

Dr. Hanif Mohammed

Strategic Advisor, Executive Coach, Leadership and Development Expert

Dr. Hanif Mohammed brings over 30 years of experience guiding senior leadership across sectors to achieve strategic excellence. Having worked with 270+ organizations, his expertise lies at the intersection of strategy, business management, and human capital development.

Learning Outcomes

- Drive strategic innovation using design thinking frameworks
- Align human-centered design with corporate strategy
- Apply tools like empathy maps, MVPs, and journey maps
- Lead ideation, testing, and iteration within teams
- Create scalable, impactful business solutions
